

We are looking for a Test Data Analysis Specialist

AeroNordic is constantly improving our test data analysis. And therefore, we are now looking for a new colleague with flair and passion for data analysis and reporting processes.

The data is centered around our rain erosion test rig - both test data management and derived blade performance analysis.

We have partnered up with some of the brightest heads within Artificial Intelligence, and we are all very ambitious in everything we do.

Relevant educations for this position would be:

- Mechanical engineer/ Maskinmester
- A Master's in Mathematics
- A Master's in Statistics
- Similar educational background

You will be teamed up with a small and dedicated team of material engineers and composite technicians.

Please contact:

Jon Ibsen by email jobs@aero-nordic.com, or on telephone: +45 25 111 675
